Functionality Testing Scenarios

Name Textfield

1. Component Name : Name Textfield

2. Requirement : 1. Should accept minimum 3 alphabets & 20 alphabets.
2. It is mandatory field after clicking on 'Buy Now'

3. Inputs : xy , x1 , z^2 , sinθ , sai@ , blank
xyxyxyxyxyxy , sh!v@ , saicharan

4. Scenarios :

1. verify/validate that name textfield should accept saicharan
2. verify/validate that name textfield should not accept xy.
3. verify/validate that name textfield should not accept x1.
4. verify/validate that name textfield should not accept z^2
5. verify/validate that name textfield should not accept sinθ
6. verify/validate that name textfield should not accept sai@
7. verify/validate that name textfield should not accept blank
8. verify/validate that name textfield should not accept xyxyxyxyxy.
9. verify/validate that name textfield should not accept sh!v@.

Product Textfield

1) Component : Product Textfield

2) Requirement :
The brand name should consist of alphabet or alphanumeric values & should 3 to 5 characters.

3) Input : AB, A^2, Blank, br@nd, 10!, brandbrandbrand, 1, shiva.

4) Scenarios:

1. verify/validate that product textfield should accept shiva.
2. verify/validate that product textfield should not accept AB.
3. verify/validate that product textfield should not accept A^2.
4. verify/validate that product textfield should not accept blank
5. verify/validate that product textfield should not accept br@nd
6. verify/validate that product textfield should not accept 10!
7. verify/validate that product textfield should not accept brandbrandbrand.

Component Name: Address Text Area

Requirement : it should accept the character from 2 - 200

Optimised Input : H.NO: 1341-8-12 , IV phase, kphb Hyderabad 500072 , Blank , @@$₹#--\@ , H.NO ------ Hyd ---- 200+ characters.

Scenarios:

1. verify/validate that address text area should accept H.NO: 1341-8-12, IV phase, kphb, Hyderabad 5000072.

2. verify/validate the address ~~text area~~ should not accept blank.

3. verify/validate the address text area should not accept @@$₹# --/@

4. verify/validate that address text field should not accept H.NO. ---------- Hyd ---- 200+ characters.

Email Address Textfield

1) Component Name: Email Address Textfield

2) Requirement :

1) It is mandatory
2) it should accept valid emails any with domain i, e · gmail, hotmail, yahoo.
3) It can accept alphabets numbers & special characters but spaces not allowed.

3) Inputs:

shivasai@gmail.com, gamail.com, shivagmailcom
blank, 123gmail, @shivagmail.com, shivacom·gmail

4) Scenarios:

1) verify/validate that email address textfield should accept shivasai@gmail.com
2) verify/validate that email address textfield should not accept gamail.com.
3) verify/validate that email address textfield should not accept blank
4) verify/validate that email address textfield should not accept 123gmail
5) verify/validate that email address textfield should not accept @shivagmail.com
6) verify/validate the email address textfield should not accept shivacom·gmail.

Component Name:- Contact Textfield [ ]

Requirement :- * it should accept 10 digit number
* it should accept poisitive integer
* it should accept the number which are starts with 6/7/8/9

optimized inputs: 9848583828, ABCD, 9081341721/3
Blank, 9@48453825, 98+241235
9342, 6Ab3417, 78312, 14701

Scenario:

1. verify/validate that contact textfield should not accept 9848583828.
2. verify/validate that contact textfield should not accept AbcdEFGHIS
3. verify/validate that contact textfield should not accept 9081341721/3
4. verify/validate that contact textfield should not accept Blank
5. verify/validate that contact textfield should not accept 9@48453825.
6. verify/validate that contact textfield should not accept 98+241235
7. verify/validate that contact textfield should not accept 9342
8. verify/validate that contact textfield should not accept 6Ab3417
